Nazario A. Ayala — Web Developer
+415-595-4499 — n@niztech.com

I am a web developer with experience working with small marketing teams seeking a creative company that is looking for someone who can work with a designer or manager on projects that solve problems and tell stories. I have experience working with technical and business people alike.

Technical Skills

- 5+ years experience designing and creating database driven websites using MySQL, PHP, HTML, CSS, and JS.

- Knowledge of content management systems like Drupal, WordPress, and SquareSpace. Developed custom modules for Drupal. Experience with MVC frameworks.

- Comprehension of modern coding paradigms and frameworks: jQuery, AJAX, Angular, mobile first.

- Appreciates and uses DRY KISS development practices.

- Soft skills: Strong work ethic, passionate, enjoys working with people to solve technical issues, adaptable able to learn new frameworks.

Experience

Niztech   2015-Current
Freelance Web Developer

- Developed designs for use in WordPress, Drupal, and SquareSpace for clients in various industries including legal, publishing, medical, NGO, and others.

- Provided general maintenance on web and email servers as well as basic training to employees.

Adyen Inc   2015
Developer Support

- Support merchant integrations with Adyen platform using internet technologies (HTML / Javascript / PHP / SQL).

- Provide Tier 1 & Tier 2 support in English and Spanish to merchants and provide troubleshooting support via phone and web-based tools.

- Advise merchants on the best implementation practices for new markets.

Revel Systems   2013 - 2015
Quality Assurance Engineer

- Originally hired as a Solutions Engineer, quickly promoted to QA in charge of special projects.

- Developed tools in python for quick deployment and configuration of peripheral devices.

- Created Bugzilla test cases for major product revisions and oversaw their execution.

- Occasionally managed a small team of iOS developers for minor product features.

Jackson Family Enterprises   2012 - 2013
Sub-Contract: Web Developer, Web Service Consultant

- Augmented JFE's brand content management team as an in-house developer while they transitioned from static sites to a Drupal environment for their 40+ wine brands.

- Created custom Drupal modules and custom JS for unique web experience tailored to the wine industry.

- Migrated table based to DIV based site layouts. Focused on browser compliance and load speed.

- Fixed bugs in PHP, Coldfusion, and ASP.

- Optimized e-commerce eWinery ship-compliance implementation for customer facing websites.

- Worked with brand team to mockup site designs UI/UX beforwwwe leveraging full dev resources.

- Improved effectiveness by training and supporting team members with LAMP, Git, and AWS stack.

Capper and Associates   2010 - 2012
Product R&D, Web Developer, UI UX Engineer

- Developed PHP, MySQL driven web tools for the management of unreleased film and audio materials for record label and major motion picture companies.

- Created a prototype PHP+JS site that converts 2D still images into 3D content for My3D viewer.

- Worked with iOS dev team on improving engagement user experience of native apps.

- Participated in product development and national launches, including Tooth Tunes.

Examples of Work

- www.niztech.com — HTML, JavaScript, jQuery — Personal site

- www.ritascomos.com — WordPress

- www.elviaschildcare.com — HTML, JavaScript, jQuery

- Some sites that use age gate and shopping cart Drupal module:

  - www.cambriawines.com — Drupal

  - www.champderevesvineyards.com — Drupal

  - www.edmeades.com — Drupal
